

527 North Maple Street

Scope: Interior and exterior building renovation

Location: Murfreesboro, Tennessee

Owner: Roger Hopkins

Located in the heart of downtown Murfreesboro, this 6,000-square-foot building required extensive interior and exterior renovations. New doors and windows were installed and the interior was completely redone. As a result of the structure's age and condition, our team completed several rounds of due diligence and designs to ensure the project was both structurally and financially feasible for our client. Built in 1978, the building is located in an area that is part of an ongoing downtown revitalization.

"Dow Smith Company came highly recommended to me and they surpassed my expectations at every turn. From the early-stage coordination of the architects, engineers, and city planners, to the performance and supervision of contractors of every specialty, Dow Smith Partner Joey Rhyne delivered a beautiful, high-quality project on time and on budget. At the end of the project, my message to Joey and his team was personal: the opportunity to work with you has been my good fortune and one that I will never forget."

— Roger Hopkins, Owner
