

Mulch 'N More

Scope: New office space and maintenance facility

Location: Murfreesboro, Tennessee

Owner: Eddy Queen

Queen's Tree Surgery has been serving Middle Tennessee for nearly 80 years. The company, which was started by Wayne Queen in 1942, is very much a family business. The Queen family purchased 100 acres on Burnt Knob Road and selected the Dow Smith Company team to construct their new Mulch 'N More facility.

The 11,590-square-foot pre-engineered metal buildings provide Queen's Tree Surgery with a new office space and warehouse building. The Mulch 'N More project was not without its share of challenges—the site proved difficult for electrical, water, and plumbing utilities, including the unique fire sprinkling system required. Despite these obstacles, the Dow Smith Company team, in partnership with Kevin Goins Architecture, was able to provide Queen's Tree Surgery with a facility that will serve them for years to come.
